When the form is completed, click the **Create** tab.

Describe damages that constitute a health and safety hazard to the general public?

Describe the different populations adversely affected either directly or indirectly by the loss of public facilities or damages?

Describe the economic impact?

Did previous state or local hazard mitigation measures reduce otherwise eligible costs?

Can the potential sub-grantee respond and recover from the damages quickly and without a degradation of services?

What is the impact on Public Services if a declaration is not granted?

While all fields **are not required to continue to the next step**, we request that they are filled out as accurately and completely as possible.

These questions help provide context to your application by describing disaster-related impacts, which is needed when justifying the request for assistance to FEMA.
